

The GigFlapping Song!

Packets dropping...
Console locking...
Boss is knocking...

GigE ports down, wait, now
they're up again
and the router's in disarray
GigE ports down, wait, now
they're up again
Now I think it's time to RMA

GigE ports down, wait, now
they're up again
and they're never going to be
the same
GigE ports down, wait, now
they're up again
gotta find an SE to blame

Pinging with no reply
Pinging with no reply

You got your STM
over 1310
You got your SRP
which is DPT

You got your Sonet Rings
connected via DPT
You got your OC3's to your
ISP

Oh, fiber cut, ports are shut,
man this sucks

GigE ports down, wait, now
they're up again
and the router's in disarray
GigE ports down, wait, now
they're up again
Now I think it's time to RMA

GigE ports down, wait, now
they're up again
and they're never going to be
the same
GigE ports down, wait, now
they're up again
gotta find an SE to blame

You got your Single Mode
you got your Multimode
you got your GBICs

and your new ASICs

You had a fiber cut and your
service dipped
and it's all running through
the same conduit

Oh, field notice, please help
us, failed bus

GigE ports down, wait, now
they're up again
and the router's in disarray
GigE ports down, wait, now
they're up again
Now I think it's time to RMA

GigE ports down, wait, now
they're up again
and they're never going to be
the same
GigE ports down, wait, now
they're up again
gotta find an SE to blame

[PAUSE - Ad Lib sayings]

GigE ports down, wait, now
they're up again (packets
dropping)
and the router's in disarray
(console locking)
GigE ports down, wait, now
they're up again (boss is
knocking)
Now I think it's time to RMA

GigE ports down, wait, now
they're up again (pinging with
no reply)

and they're never going to be
the same (pinging with no
reply)

GigE ports down, wait, now
they're up again (pinging with
no reply)

damaging the passive
backplane (pinging with no
reply)

GigE ports down, wait, now
they're up again (packets
dropping)

and the router's in disarray
(console locking)

GigE ports down, wait, now
they're up again (boss is
knocking)

Now I think it's time to RMA

GigE ports down, wait, now
they're up again (pinging with
no reply)

and they're never going to be
the same (pinging with no
reply)

GigE ports down, wait, now
they're up again (pinging with
no reply)

damaging the passive
backplane (pinging with no
reply)
